## Parameters of Precision & Excellence

| PARAMETERS                    | UNIT              | SPECIFICATIONS |        | RESULTS |
|-------------------------------|-------------------|----------------|--------|---------|
|                               |                   | Min            | Max    |         |
| Urea content                  | %(m/m)            | 31.8           | 33.2   | 32.85   |
| Density                       | g/cm <sup>3</sup> | 1.087          | 1.093  | 1.0895  |
| Refractive index              | —                 | 1.3814         | 1.3843 | 1.3829  |
| Alkalinite as NH <sub>3</sub> | %(m/m)            | —              | 0.2    | 0.015   |
| Biuret                        | %(m/m)            | —              | 0.2    | 0.0132  |
| Aldehyde                      | Mg/kg             | —              | 5      | 0.16    |
| Insoluble matter              | Mg/kg             | —              | 20     | 0.536   |
| Phospate PO <sub>4</sub>      | Mg/kg             | —              | 0.5    | 0.16    |
| Calcium                       | Mg/kg             | —              | 0.5    | 0.2     |
| Iron                          | Mg/kg             | —              | 0.5    | 0.27    |
| Copper                        | Mg/kg             | —              | 0.2    | 0.035   |
| Zinc                          | Mg/kg             | —              | 0.2    | 0.184   |
| Chromium                      | Mg/kg             | —              | 0.2    | 0.2     |
| Nickel                        | Mg/kg             | —              | 0.2    | 0.054   |
| Aluminum                      | Mg/kg             | —              | 0.5    | 0.251   |
| Magnesium                     | Mg/kg             | —              | 0.5    | 0.17    |
| Sodium                        | Mg/kg             | —              | 0.5    | 0.291   |
| Potassium                     | Mg/kg             | —              | 0.5    | 0.12    |
